MISCELLANEOUS READING. DEATH BY HORNETS.

The following is an extract of a letter

from India which appears in the London "A most melancholy accident occurred here on the 10th instant. Two European gentlemen belonging to the Indian Railway Company, -- viz: Messrs. Armstrong and Boddington-were surveying a place called Bunder Cooda for the purpose of throwing a bridge across the Nerbudda, the channel of which being in this place from 10 to 50 yards wide. is fathomless, having white marble rocks rising perpendicularly on either side from 100 to 150 feet high, and beetling fearfully in some parts. Suspended in the recesses of these marble rocks are numerous large horner's nests, the immates of which are ready to descend upon any unlucky wight who may venture to disturb their repose. Now, as the boats of these European surveyors were passing up the river, a cloud of insects overwhelmed them; the boatmen as well as the two gentlemen jumped overboard, but alas! Mr. Boddington, who swam and had succeded in clinging to a marble block, was again attacked, and being unable any longer to resist the assault of the countless hordes of his infuriated winged foes, threw himself into the depths of the water never to rise again. On the fourth day his corpse was discovered floating on the water, and was interred with every mark of respect. The other gentleman, Mr. Armstrong, and his boatmen, although very severely stung, are out of danger. This sad occurrence has cast a gloom

from this town." PIONEER MILLS FOR SALE!

WE are authorized by the proprietors to offer W at private sale this extensive establishment. The MILL BUILDING is fire proof, built on piles, with stone foundation, and is situated directly on the River front, and within a few yards of the Orange & Alexandria and Manassas dap Railroads, with Wharves, and depth of water ufficient to accommodate vessels of the largest class. Its dimensions are 122 feet in length, by 50 feet in width, four and a half stories high, and

A GRAIN ELEVATOR is also attached, by which grain can be rapidly discharged from vessels immediately into the Mill. The Grain Bins are capable of holding 70,000 bushels of Wheat. The Elevator is worked by a small engine, separate from that used in manufacturing, so that grain can be received while the Mill is not in operation. There are TWELVE PAIRS OF STONES, of

44 feet diameter, capable of manufacturing, when in full work, about 800 barrels of Flour per day. The ENGINES and BOILERS are very superior, made by Otis Tufts, of Boston, Mass., with-out regard to expense. There are six Boilers, with return flues. The Engines are high pressure, and of 250 horse power.
WATER and GAS have been introduced through

out the entire establishment, with Hose, &c., at tached to the water pipes in each story. The above is only a general description of this extensive Flouring Mill. Persons desirous of purchasing, will, of course, visit the establishment, where every information will be afforded them. The Machinery is all nearly new, and of the most approved description, it having been the de-sign of the proprietors to erect a Mill second to

none in this section of the country. In it will be fancy Lawns, with other articles, to which we reslate, and with iron window shutters, adjoins the Mill. Its dimensions are 100 feet in length, by 31 feet in width, two stories high. It is per-fectly fire proof, and has in it a full complement of Tools, &c., all in perfect order. There are now about 7,000 FLOUR BARRELS on hand, which will be sold with the Mill. Also, a lot of Cooper's -tuff, STAVES, HEADING, &c.

It is rarely that such an establishment, so ex-tensive and complete in all its appointments, is offered to the public. The terms of the sale will

be made easy.
